Ahmedabad, Gujarat, India

Product Designer with over 1.5 years of experience in crafting user-focused digital products for mobile, web, and no-code platforms. I combine strong UX principles with high-quality UI design, along with a technical background in Computer Engineering, to create scalable, intuitive experiences that incorporate subtle interaction and motion design elements. Proficient in all stages of product development, from research and flows to prototyping and developer handoff. In my spare time, I engage in self-directed design projects and experiments to enhance my skills and explore new tools. I am passionate about continuous learning and contributing to meaningful products.

EXPERIENCE

Techlusion → Tech services & digital solutions startup

UI/UX Designer - Founding Designer

18th November 2024 - Present, Ahmedabad

- Designed the complete mobile app MVP, flows, wireframes, UI, and prototypes, with 6 theme variants built using Figma variables & modes.
- Designed and optimized 8+ full website designs, focusing on usability, clarity, and conversion, including reusable templates for fast multi-client delivery.
- Developed & launched 9 Webflow websites with responsive layouts, SEO-ready structure, and smooth animations.
- Created 2D & 3D assets, illustrations, icons, and GIF animations for product interfaces and marketing.
- Improved the Techlusion website through SEO enhancements and content optimization, achieving 100%+ growth in visibility and traffic.
- Collaborated with developers using pixel-perfect vibe-coded screens, reducing development time by 40% and rework.
- Managed and mentored interns for 6+ months, ensuring high-quality output and structured workflow.
- Executed social media initiatives that drove a 28% increase in engagement across channels.
- Led design across branding, product development, and marketing as the solo founding designer.

Miko → AI learning platform for children

Design Intern

20 May 2024 - 16 August 2024, Remote [Mumbai]

- Redesigned the Learning Buddy UI, contributing directly to production-level app UI used by thousands of users.
- Designed 1,000+ image assets including book covers, story thumbnails, module graphics, and in-app illustrations.
- Collaborated with developers to ensure correct asset structure, UI alignment, and functional integration.

Freelancing / Product Designer

January 2024 - May 2024

- Designed an end-to-end mobile app + admin dashboard for an online tailoring and fabric logistics system.
- Created complete UX workflows, user journeys, wireframes, and high-fidelity UI for both mobile and web platforms.
- Managed client communication, requirement discovery, feedback integration, and final delivery for the full product cycle.

ABOUT

I am seeking

A role where I can apply my multi-disciplinary skills and work on impactful digital products.

I graduated from

LDRP Institute of Technology & Research
(B.Tech CE, 2021-2025)

I have achieved

Techlusion's First Employee of the Quarter Award for outstanding contributions across design and product.

My abilities include

Understanding UX flows, wireframing, high-fidelity UI design, design systems, rapid prototyping, social media design, content writing, and basic web coding.

Proficient in

Design: Figma, Webflow, Blender, Lottie
Code: HTML, CSS, JS, Vibe Coding
Other: Content Writing, SEO, Analytics

I speak

English, Gujarati, and Hindi.

I am passionate about

Sharing ideas through design, mastering new tools, and exploring various product design areas to become a versatile designer.

In my free time,

I watch anime, read manga, and explore new trends in design and the IT industry.
