Pune, Maharashtra, India

Product Designer with **2+ years of experience** and **15+ shipped Projects** that balance user needs with business goals. Specialist in UX research, interaction design, and motion, with a unique ability to bridge the gap between design and frontend development. Proven track record in taking products from **zero-to-one** across SaaS platforms, mobile apps, and complex dashboards. I thrive on untangling complex friction points to reveal simple, elegant solutions that feel both high-performance and **human-centric**. A hybrid creator comfortable in Figma and code, leveraging **AI-driven workflows** to ship polished, pixel-perfect experiences at pace.

### EXPERIENCE

#### Techlusion

18th November 2024 – Present, Ahmedabad

##### Product Designer – Founding Designer

- Led product design as the founding designer across **15+ products**, spanning SaaS platforms, healthcare products, enterprise dashboards, and mobile apps, **working directly with founders, developers, and stakeholders** to turn business requirements into scalable solutions.
- Designed a loyalty rewards app **MVP end to end**, including user flows, wireframes, prototypes, and **6 scalable themes** built with Figma Variables and Modes. The app surfaced rewards buried in users' inboxes so they could find and redeem earnings they would otherwise have lost.
- Designed an internal client collaboration tool that streamlined how the team shared work, gathered feedback, and tracked approvals, reducing communication overhead with clients by **roughly 50%**.
- Simplified a complex healthcare intake experience by redesigning its information architecture and delivering a production ready frontend in five days.
- Designed role based **dashboards for a kiosk management** platform serving admin, operator, and kiosk users, giving each role a tailored interface so they could work within their own permissions without navigating irrelevant controls.

##### Design & Development

- Shipped on a steady **two-week cadence**, delivering two production-ready templates per month for time-sensitive healthcare launches, with SEO-ready architecture, animation, and reusable components across **9 launched projects**.
- Built **AI-assisted website** templates and internal automation tools with Python, Playwright, and Blender, cutting manual work and delivery time.
- Reduced development time by **40%** by delivering production-ready, pixel-perfect interfaces and collaborating closely with developers on handoff.

##### Leadership & Growth

- Mentored and **managed design interns**, teaching UX, UI, **design systems**, and design thinking while reviewing their work to maintain quality.
- Drove 100% growth in search visibility through SEO and content optimization, and produced marketing creatives that lifted social engagement by 30%.
- Awarded First Employee of the Quarter** for contributions across product, design, engineering, and marketing.

#### Miko

20 May 2024 – 16 August 2024, Remote [Mumbai]

##### Design Intern

- Redesigned the Learning Buddy experience by identifying usability issues and delivering production-ready UI improvements used by thousands of children.
- Designed multiple UI concepts and interaction patterns for the mobile application, enabling faster design exploration and product decisions.
- Created more than **1,000 production assets**, including book covers, story thumbnails, module graphics, illustrations, and in-app visual content.
- Designed **marketing emailers** and promotional assets aligned with brand guidelines and engagement campaigns.
- Collaborated closely with developers to ensure accurate implementation and asset delivery.

### ABOUT

#### I am seeking

A Product Design role where I can create intuitive digital experiences across product strategy, UX, UI, and implementation.

#### I graduated from

LDRP Institute of Technology & Research  
(B.Tech CE, 2021–2025)

#### I have achieved

**Techlusion's First Employee of the Quarter Award** for contributions across product, design, engineering, and marketing.

#### My abilities include

- Product Thinking
- UX Research
- User Flows & Information Architecture
- Wireframing & Prototyping
- High-Fidelity UI Design
- Design Systems
- Accessibility
- Motion Design
- Frontend Collaboration

#### Proficient in

- Design:** Figma, FigJam, Webflow, Blender, After Effects, Lottie
- Development:** HTML, CSS, JavaScript, GSAP, Webflow CMS, AWS Amplify
- AI & Automation:** Claude, Python, Playwright, Prompt Engineering, Workflow Automation

#### I speak

English, Gujarati, and Hindi.

#### I am passionate about

Building thoughtful digital products, exploring AI-powered workflows, creating meaningful user experiences, and continuously learning new technologies.

#### In my free time,

I watch anime, read manga, explore emerging design trends, and experiment with motion, 3D, and AI tools.
